Main Page/Online Systems/inter-university exam registration

Overview

Note: This service is currently not offered because of VPN obligation!

The function inter-university exam registration enables NAWI Graz students to call up all exam dates of both universities in an online system and to register or deregister directly there.

Guide to set-up the inter-university exam registration

1. Log into one of the two systems (online.uni-graz.at oder online.tugraz.at) and go to personal settings. The examples shows how to do so in TUGRAZonline.

2. Chose the system you like to couple with (given the example, it is UNIGRAZonline)

The screenshot shows a web interface for selecting a preferred color scheme and connecting to partner universities for exam registration. On the left, there are buttons for '< Zurück', 'Änderungen übernehmen', and 'Abbrechen'. The main content area has a header 'Wähle dein bevorzugtes Farbschema' with a dropdown menu for 'Theme Variante' set to 'Standard-Design (co-tug)'. Below this is a section 'Verbinden mit Kooperations-Universitäten für Prüfungsanmeldungen'. It lists functionalities: displaying active exam registrations for all connected online systems, searching for the entire exam offer of all connected online systems, and direct exam registration/cancellation for all connected online systems. It also lists prerequisites: an active account in the online system. A 'Vorgang' (process) section explains that after selecting an online system and saving, the user will be prompted for their username and password to establish the connection, and that the connection will be removed if the selection is later lifted. Under 'Online-System(e)', there are two entries: 'UNIGRAZonline' and 'KUGonline', each with a 'Koppeln' (Connect) button. The 'Koppeln' button for 'UNIGRAZonline' is highlighted in yellow.

3. Now enter your UNIGRAZonline credentials

Afterwards all exam dates of UNIGRAZonline are visible in TUGRAZonline in the application "exam dates" and you register/deregister directly!

Note: The coupling is unidirectional. In order for the function to exist in both systems, it must also be set up once in UNIGRAZonline.

The screenshot shows the login form for 'Über UNIGRAZonline anmelden'. It has input fields for 'Benutzername' and 'Kennwort'. A red circle highlights the 'Kennwort' field with a callout bubble containing the text 'UNIGRAZonline BenutzerInnenname und Passwort eingeben'. Below the input fields are two buttons: 'Zugriff erlauben' (highlighted in blue) and 'Zugriff verweigern'. At the bottom, there is a circular logo with the number '2' and the text 'TUGRAZonline', and a link 'Über die App'.

4. You can decouple the systems by choosing so in your persona settings (see step 1 above)
